

1. ABACUSBIO LTD

Applying world class science and technology to improve and enhance performance, resilience, competitiveness, responsiveness, and profitability of client enterprises.

2. ASKBIO EUROPE

Leading the way in end to end gene therapy technology and AAV therapeutic assets. European headquarters of the AskBio family following acquisition of Synpromics Ltd.

3. AXOL BIOSCIENCE LTD

Provider of iPSC-derived cells, media, and characterisation services. Merged with Censo Biotechnologies, a cell biology CRO with iPSC-related technology expertise.

4. BEEBYTES ANALYTICS CIC

Social enterprise specialising in honey bee genetics and DNA analyses to characterise genetic admixture and identify the sources of forage visited by different bee species.

5. BETA BUGS LTD

Insect breeding company that creates high performance breeds for the rapidly growing 'insects-as-protein' sector.

6. CARCINOTECH LTD

Cancer microfluidics technology company, manufacturing 3D printed bio chips using patient specific stem cells for personalised cancer drug testing, discovery and trials.

7. CLEAN WATER WAVE LTD

Blending advanced technology with robust engineering, to transform polluted ground and surface water into clean water, safe for consumption and discharge.

8. CYTOCHROMA LTD

Producing stem cell derived liver models and tailored toxicity testing to support a variety of life science companies in the acceleration of drug discovery.

9. CYTOMOS LTD

Developing and providing integrated, predictive analytics systems for intelligent bioprocessing in biopharma and cell therapy domains.

**Deep
Science
Ventures**

10. DEEP SCIENCE VENTURES

Bringing together teams of scientists to seize crucial opportunities and redefine industries. With the Roslin Institute, DSV has launched the Food & Agriculture Science Transformer (FAST), creating Scotland's first venture studio.

11. FOOD CHAIN ENTERPRISES LTD

Providing global business consulting services and comprehensive support to integrated food production and manufacturing to optimise processes and profit.

12. GREEN BIOACTIVES LTD

Innovative, start-up from the University of Edinburgh, working with nature to create sustainable sources of plant biomolecules and extracts.

13. GREENGAGE ENLIGHTENED FARMING LTD

Delivering LED agricultural lighting, sensors and control systems for improved farming environments for poultry, pigs and cattle.

14. INGENZA LTD

World leader in the application of industrial biotechnology and synthetic biology; and established inABLE®, a proprietary combinatorial genetic platform.

15. LANDCATCH LTD

Part of Hendrix Genetics, a global multi-species breeding company with activities in layer poultry, turkeys, pigs and now aquaculture.

16. MV DIAGNOSTICS LTD

Development and provision of innovative immunoassays and reagents for use in clinical and research laboratories worldwide.

17. N2 PHARMACEUTICALS LTD

Developers of a unique injectable drug N2-01, proven to dramatically increase the effectiveness of artificial insemination of dairy cattle, a major problem in agriculture.

18. PULCEA LTD

Improving animal welfare and sustainability within the aquaculture industry utilising marine physics in a manner capable of delivering unique technical innovations.

PURE WATER
INTERNATIONAL

19. PURE WATER WAVE LTD

Providing safe, clean, sustainable, decentralised water packages globally with Clean Aqua For Everyone (CAFE) filtration systems, a more efficient and effective solution.

20. ROSLIN TECHNOLOGIES LTD

Delivering impact from cutting edge innovations in animal health and providing opportunities for investors looking to capitalise in food and agricultural products.

21. VETSINA ANIMAL DIAGNOSTICS LTD

Innovative animal health diagnostics for veterinary use, Enabling early diagnosis of illness and infection in companion animals and livestock.

HOT DESKING

22. BUSINESS GATEWAY MIDLOTHIAN

Offering expert help and support to new and existing businesses, including directing to grants and funding opportunities through connections with Scottish Enterprise and associated funding bodies.

23. CENTRE FOR INNOVATION EXCELLENCE IN LIVESTOCK (CIEL)

CIEL is the UK's livestock innovation Centre and one of four UK Agri-Tech Centres of agricultural innovation. Hosting Animal Health and Aquaculture Specialist.

24. DATA-DRIVEN INNOVATION – CITY REGION DEAL

Easter Bush Campus is one of a network of five hubs in the Data-Driven Innovation (DDI) Programme, a City Region Deal and mechanism for driving productivity and accelerating growth. Hosting AgriTech Sector Team Lead and Innovation Manager (Health).

25. MIDLOTHIAN SCIENCE FESTIVAL

Annual science festival each October offering a programme of fun, interesting and accessible events and activities across Midlothian.

26. MIDLOTHIAN SCIENCE ZONE

Partnership group of science, technology and innovation parks; research institutes; academic institutions and tenant companies, all located within Midlothian.
